### EXPERIENCE

#### Full stack web developer, Algebrat technologies — Constantine, Algeria.

December 2018 - Present

- Helped the team managing our clients by creating a dashboard using Angular and Laravel/lumen.
- Conserved efforts and time building dynamic landing pages for our clients, by creating one business logic codebase.
- Accelerated the development of our projects by writing node scripts that helped share one codebase between some of our projects.
- Provided large amount of data of hotel prices for a client, by scrapping various hotel booking websites using Goutte/php.
- Eased the integration of our hotel booking API by our clients through a documentation page that I created using Swagger-ui.
- Designed and built our company's new website with wordpress.
- Managed and Organized the workflow of the projects I worked on with Trello, and used GIT for versioning

### EDUCATION

#### Bachelor of Computer Science, University of Abdelhamid Mehri — Constantine, Algeria.

Septembre 2015 - June 2018

Majored in Information Technology (IT), some projects that I made:

- A car managing system with UML diagrams and designed a UI prototype with Photoshop.
- A student attendance management system as a web app, created with JQuery and MaterializeCSS.
- A transports tickets reservation system as a desktop app coded in JAVA utilizing JavaFX and JDBC.

### PROJECTS
