EXPERIENCE

Full stack web developer → Algebratec Technologies   NOV 2018 - OCT 2019
Constantine, Algeria.
- Helped the team managing our clients by creating a dashboard using Angular.
- Create an API service with Laravel/Lumen implementing token authentication and analytics.
- Built 6 landing pages with Angular utilizing Angular material, Bootstrap and bulmaCSS.
- Accelerated the development of our websites 3 times by creating a special angular project structure and writing NodeJs scripts that helped share one codebase between them.
- Collected data from 3 hotel websites by creating a scraping tool that I built using Goutte/php.
- Eased the integration of our hotel booking API by creating docs page with React and Swagger-ui.
- Designed and built our company's new website with wordpress and Elementor.
- Designed a demo website for hotel including booking with Wordpress and Angular.
- Managed and Organized the workflow of the projects with Trello, and used GIT for versioning.
- Customized a NativeScript project to hold multiple apps at once sharing the same business logic.

Android developer → Self Employed   MAR 2016 - SEP 2019
http://bit.ly/megaache_apps
- Created 25+ android apps for different purposes.
- Developed the apps mainly in JAVA mastering all of its features.
- Integrated google auth, maps SDK and the Drive API for multiple apps.
- Used the LibGDX framework to create two games.
- Created a RESTful API service for an app with Laravel (PHP).
- Implemented Firebase as a backend for two apps.
- Created modern designs following google's material design guidelines.
- Used the MVVM architecture utilizing data binding and jetpack components.

EDUCATION

Bachelor of computer science → University of Abdelhamid Mehri Constantine   2015 - 2018
